

DISCOVERY SESSIONS - KEY STAGE TWO

We offer enriching, curriculum-linked sessions designed to enhance and consolidate children's learning. These hands-on sessions are brought to life with activities relating to the natural world using bio-facts (skulls and skins), and up to three live animals. Functional skills are embedded throughout our sessions.

Detailed below are the exciting range of education sessions that we offer Key Stage 2 students. All sessions last 45 minutes.

Roots and Shoots

Plants are amazing! This session focusses on how the parts of a plant work together to move water and grow! Students will also be acting out the role of plants and pollinators. A highly interactive session with a minibeast meet and greet.

Year 3 Science: Plants, Year 4, 5 & 6 Science: Living things and their habitats.

Minibeasts and Me

A bug, a creepy-crawly, a beast! He'll tickle your skin then go in for the sting! Arachnids, invertebrates, molluscs and myriapods, hiding in nooks and beneath darkened rocks... Come search for these minibeasts, and let's sort them out! Get up close and personal with minibeasts and find out how to group them.

Year 3 Science: Animals, including humans. Year 4, 5 & 6 Science: Living things and their habitats.

Who Eats Who?

It's time to take a walk on the wild side! Find out who's coming to visit from our variety of smaller, friendlier animals. Learn about who eats who and how! Explore the world of producers, prey and predators. We will discover the differences between herbivores, carnivores and omnivores using unique and exciting bio-facts and identify how they link together in food chains.

Year 3 & 4 Science: Animals, including humans.

Caring for Nature

Rothschild giraffe, African wild dogs and Sumatran tigers are just some of the endangered animals WMSP cares for that are threatened with extinction in the wild. Caring for Nature introduces students to the wonderful world of nature that surrounds them and raises awareness of the problems faced by animals both abroad and at home.

Year 4 Science: Living things and their habitats

Life Cycles

How do animals grow and reproduce? Children will build a lifecycle and develop their understanding of how animals produce their young. They will discuss the importance of reproduction. This topic includes fun activities and interaction with some live animals.

Year 5 Science: Living things and their habitats.

Footsteps Through Time

Join us on a journey through time to discover what life was like 65 million years ago. What kinds of creatures existed? Children will be able to see real fossils and other unique bio-facts to see how creatures have changed over time to live in new climates and ecosystems.

Year 3 Science: Rocks, Year 6 Science: Evolution and inheritance

Paws, Claws and Whiskers

Soft fur, sharp claws and twitching whiskers... What's your favourite animal? One that meows? One that barks? Or maybe one that scurries or slithers? From pets at home to animals in the zoo, let's find out how animals are different and how they have adapted and evolved to survive the challenges of life.

Year 4 Science: Animals, including humans. Year 6 Science: Evolution and Inheritance.
